

-2022-

The Technology Education Association of Illinois will hold its 29th Annual Illinois Technology Education Conference (ITEC) on October 7th at the Brown Ballroom, in the Bone Student Center, on the campus of Illinois State University in Normal, Illinois. Our association would like to invite you to be an exhibitor at our state conference to showcase your technology education & engineering products, services, tools, equipment, literature, and other related education products to Illinois teachers, administrators, and pre-service teachers.

We are currently offering exhibitor spaces for as low as \$350, with non-profits and universities for \$175. We have streamlined our registration options to help keep costs as low as possible.

Location of Exhibitors

Vendors and exhibitors are incorporating into our opening and general session of our conference in Brown Ballroom at the Bone Student Center. Our goal is to place our vendors and exhibitors directly where all conference attendees will be to maximize exposure and traffic; we want you to be in the middle of the conference action!

There will be time where no breakout sessions scheduled so all conference attendees have the opportunity to discover what you and your company/organization have to offer. The scheduled hours for display in the Brown Ballroom will be on Friday, October 7th from 8 AM to 12:30 PM. Set up is available the morning of and parking is available at the Bone Student Center.

Our association would like to express its thanks to the vendors and exhibitors that have supported our organization and our Illinois teachers in the past. Enclosed with this letter you will find the conference exhibitors fees, which I believe you will find to be very competitive with the other conferences that you attend.

If you have any questions or would like additional information, please feel free to contact me via e-mail at wmerchantz@hf233.org

Professionally,
